

PRC 100 coin counter

COST EFFECTIVE HIGH SPEED COIN COUNTING

- ➔ simple set up
- ➔ up to 10 denominations
- ➔ Storage memory for counted coins

→ Description

This product line represents a very cost effective concept of coin processing. The PRC 100 is mainly used for counting coins or tokens. It can continuously count (CC) and count to a preset number (PC). The PRC 100 processes pre-sorted coins. The double knob adjustment allows simple setup. One setting of the knob is enough to select the proper denomination out of a maximum of 10 different denominations. Coins which are smaller by at least 0.5 mm than the present set denomination are off sorted automatically. A memory allows the storage of the counted coins.
